

## Lexi-Comp INTEGRATED

### The New Choice in Clinical Decision Support

Lexi-Comp® Integrated™ supplies the programming tools and content to integrate our trusted data into your HIS system. Now, clinicians can access the information they need and trust within the HIS applications they use everyday. Drug interaction, allergy, duplicate therapy, and dose range checking content provide a core clinical decision framework to improve decision making and ultimately influence positive patient outcomes.

With patient safety a top priority, Lexi-Comp Integrated allows you to implement our trusted drug information for Clinical Decision Support, to ensure the most accurate level of care for your patients.

#### Lexi-Data™

Through a core clinical decision framework, Lexi-Data addresses the integrated drug data requirements of HIT vendors who implement the data, and healthcare providers who utilize the data. This product provides patient specific alerts (i.e., drug interaction, allergy, duplicate therapy and dose range checking) with referential content to support sound treatment decisions.

#### Integrated Reference

Lexi-Comp offers the ability to integrate reference content from Lexi-Comp® ONLINE™, our trusted resource used at thousands of hospitals and healthcare systems. This integration option provides the ability to link from within workflow applications and decision support alerts to more detailed Lexi-Comp reference information, aiding in pharmacotherapy decision making.

**Clear. Concise. Accurate.**

*“We spent months researching and investigating the competition. Lexi-Comp business partnering and licensing division gave us the tools we needed to test it in our application to assure our clinicians that we had a reliable and trustworthy source. Their responsiveness to inquiries and requests sold us on a solid partnership we could count on.”*
